THERMOTRACK WEBSERVE

PLUG&TRACK by PROGES PLUS

TEMPERATURE, HUMIDITY, AND OTHER PARAMETERS MONITORING ON THE CLOUD

Thermotrack Webserve is a cloud-based platform designed for monitoring temperature, humidity, and other physical parameters in cold rooms, freezers, laboratories, industries, and more.

It works with various sensors and technologies : FoxNet, Sensor Net Connect, Ivy NB-IoT wireless transmitters...

No complicated software installation is required. Monitoring is done remotely, directly from a web browser or smartphone.

The platform allows management of multiple users, configuration of sensors and thresholds, and sends alerts via email, SMS, or siren in case of threshold breaches.

**REAL TIME MONITORING**

ALARMS VIA EMAIL - SMS - SIREN

MULTI-USERS

10 YEARS DATA RETENTION

CFR21 PART 11 COMPLIANT

THERMOTRACK WEBSERVE

- FoxNet
- Sensor Net Connect
- IVY Wireless Datalogger
- Pixie Temp
- Thermo/Hygro Button

- °C/F
- HUM
- CO_2
- 4.20 mA
- Pa/mBar
- I/O Input/Output

MAIN FEATURES

- Real time monitoring of your critical assets.
- Alarms by email, SMS, Pop Up, Siren.
- Automatic data archiving.

ADVANTAGES

- Different types of sensors, 1 single application.
- Multi sites and multi users.
- Centralization and data sharing on the cloud.
- Access from any PC, smartphone, tablet.
- 10 years secured backups.

DETAILED FUNCTIONS

- Home page with a list of sensors or layouts
- Graph display with alarm levels (high/low) and mouse zoom
- List of values with **Min, Max, Average, and MKT**
- Display of the last 24 hours and **10-year history**
- Alarm notifications via **Email, SMS, Pop-Up, and push notification**
- Alarm acknowledgment with entry of corrective actions
- Integrated notepad for adding comments
- Graph printing
- Value list printing
- Alarm list printing
- Export to **Excel**
- Automated PDF reports sent by Email
- Secure access via **login and password**
- Admin and user access management
- FDA compliant – **CFR21 Part 11**

ALERT MANAGEMENT

Receive alerts via **Email, SMS, notifications, PC alarms, or siren.** Select recipients for each sensor : single, multiple, or in cascade.

SMS messages are sent through Thermotrack. No GSM subscription is required.

360° SECURE ACCESS

Easily access your data **from any PC, tablet, or smartphone** without installing any software or app, thanks to cloud technology.

Assign login credentials to selected users and control their access rights to sensors and settings.
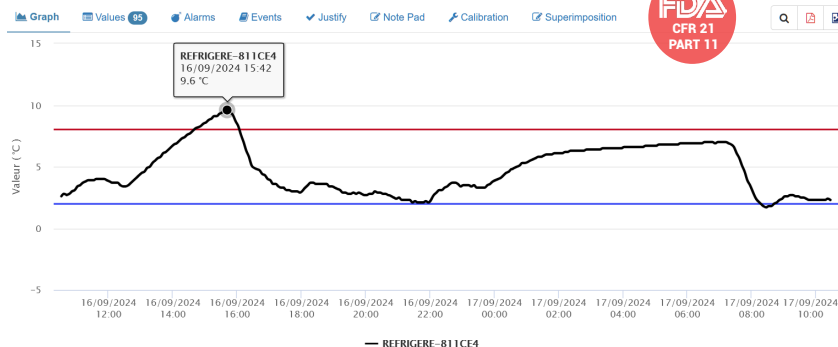

STORAGE   **FOOD INDUSTRY**   **HEALTH PHARMA**   **RESEARCH**
