

# [SOLUTION SHEET]

## FRIDGE TEMPERATURE MONITORING

REAL TIME MONITORING WITH ALARM

### THE MAIN PRINCIPLE

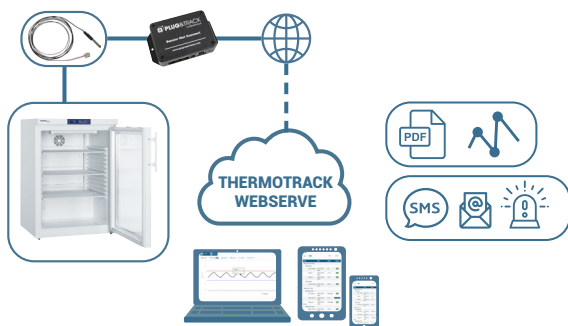

A temperature sensor in a refrigerator connected to a smart hub plugged into a network socket that sends the data directly to the cloud.

- A digital sensor -50/+90°C, resolution 0.1°C, flat cable for easy installation through the door seal
- An Ethernet or wireless connection smart hub
- An access to [www.thermotrack-webserve.com](http://www.thermotrack-webserve.com) from your PC or smartphone with :
  - Alarms via email, SMS, smartphone and PC siren notifications
  - Graphs and list of values with minimum, maximum and average values
  - Archiving for 10 years
  - Automatic PDF reports by email
  - Unlimited users

### 2 SOLUTIONS AVAILABLE :

**With Ethernet smart hub Sensor net connect**  
REF PAC0089 - ETHERNET ALARM FRIDGE PACK

**With wireless data logger FoxNet Temp**  
REF PAC0090 - WIRELESS ALARM SOLO PACK

#### ADVANTAGES :

- Attractive price
- Mains power supply
- Magnetic back

#### ADVANTAGES :

- Wireless connection
- Battery powered
- Data stored in the event of an internet outage
- Magnetic back
